

premature infant SUMMIT

Collaborating for Preemies:
Small Steps...Big Changes

Sponsored &
Hosted By:  MedImmune

Following the successful and informative 2009 Premature Infant Health Summits, MedImmune will sponsor and host Premature Infant Summits and Summit Briefs, Collaborating for Preemies: Small Steps...Big Changes in Fall 2011.

COLLABORATION:

Invited attendees include healthcare providers, advocacy, professional and parent organizations, public and elected officials and health insurers.

SMALL STEPS...BIG CHANGES:

In 2009, six Premature Infant Health Summits were conducted to address and discuss the many issues facing premature infants. Since that time many stakeholders have developed programs and initiatives, all with the goal of improving the care of premature infants.

This year we will talk about the many small steps that have been taken and, with everyone's involvement, can lead to big changes in the lives of premature infants. Topics will include:

- Born too soon...why it matters. The latest on prematurity rates and research
- Engaging national and community stakeholders to make a difference
- Review and discussion of new premature infant resources
- Current policy landscape and the impact on premature infant care
